### Profile

---

Aspiring Software Engineer and AI Enthusiast with foundational knowledge in Python, Java, and web technologies. Interested in AI tools, prompt engineering, automation workflows, and building practical digital products. Experienced in developing small-scale projects, experimenting with AI-assisted solutions, and collaborating in fast-paced environments.

### Education

---

|                   |                                                                                                                                          |                         |
|-------------------|------------------------------------------------------------------------------------------------------------------------------------------|-------------------------|
| 06/2023 – Present | <b>Sri Indu college of engineering and technology,</b><br><i>Bachelor of technology (Computer Science and Engineering)</i><br>CGPA:- 7.2 | Hyderabad,<br>Telangana |
|-------------------|------------------------------------------------------------------------------------------------------------------------------------------|-------------------------|

### Technical Skills

---

#### Programming Languages

C, Python, Java

#### Web Technologies

HTML, CSS, JS, React, Node.js, Express.js

#### Databases

MySQL, MongoDB, postgresQL

#### Tools & Platforms

VS Code, Jupyter Notebook, Git/GitHub, Firebase

### Projects

---

#### Student Productivity Board : [student-dashboard-nu-seven.vercel.app/](https://student-dashboard-nu-seven.vercel.app/)

Developed a Kanban-style productivity application with Firebase authentication and real-time task management features.

#### DropIn — Secure File Sharing Platform : [drop-in-lmr.vercel.app/](https://drop-in-lmr.vercel.app/)

Built a secure file transfer application that allows users to upload and share files through unique codes and QR-based access.

### Internships

---

03/2026 – 06/2026

#### Full Stack Developer Intern — The Crumb

- Developed and maintained frontend and backend features for The Crumb platform, including responsive UI components and API integrations.
- Supported marketing initiatives through digital campaigns, creator outreach, and promotional content coordination to increase brand visibility.
- Collaborated with the product and design team to improve usability, scalability, and overall user experience across the platform.

### Courses and Achievements

---

- Participated in AI Summit workshop focused on emerging AI tools and workflows.
- Competed in 36-hour Vibethon hackathon at Polaris School of Technology.
- Participated in GDG Agentathon hackathon at Malla Reddy University.
